

Art HerStory- Installation Guide

This guide will walk you through the steps to install and run the "Art HerStory" on your computer. Please follow the instructions carefully.

System Requirements

Before you proceed with the installation, make sure your computer meets the following requirements:

- Operating System: Windows 10, macOS, or Linux
- Python Version: Python 3.x

Installation Steps

Step 1: Python Installation

1. Open your web browser and go to the Python website: <https://www.python.org>.
2. Click on the "Downloads" tab.
3. Scroll down to find the latest stable version of Python 3.x (where x is the latest version number).
4. Click on the download link for your operating system (Windows, macOS, or Linux).
5. Once the download is complete, locate the downloaded file and run the installer.
6. Follow the on-screen instructions to install Python on your computer. Make sure to check the box that says "Add Python to PATH" during the installation process.

Step 2: Game Project Setup

1. Download the game project ZIP file from the provided source (e.g., email attachment, github location).
2. Locate the downloaded ZIP file on your computer and extract its contents to a desired location (e.g., Desktop, Documents).
3. After extraction, you should see a folder named "Art HerStory" containing the game files.

Step 4: Game Launch

Once you're inside the "ArtHerstory" folder in the command prompt or terminal, run the following command to install the game's dependencies:

```
pip install Pillow  
pip install pygame  
pip install tkinter  
pip install pytest
```

This command will automatically install the necessary libraries and dependencies required to run the game.

After the installation of dependencies is complete, run the following command to start the game:

```
python main.py
```

The game should now start and open in a new window.

Playing the Game

Follow the on-screen instructions and interact with the game using the provided controls (e.g., arrow keys, mouse clicks). Enjoy playing the game!
